Professional Summary

Full Stack Engineer specializing in building scalable, production-grade web applications across the frontend and backend. Strong experience designing React-based interfaces, implementing REST APIs with Node.js, optimizing MongoDB schemas and aggregation pipelines, and delivering secure, high-performance systems. Proven ability to take ownership of features end-to-end in fast-paced, Agile environments.

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript

Frontend Technologies: React.js, Redux Toolkit, Tailwind CSS, SCSS, Vite, Bootstrap, HTML, CSS

Backend Technologies & Databases: Node.js, Express.js, MongoDB

Tools & Development Practices: Git, GitHub, Postman, Docker, VS Code, Vercel, Render, npm/yarn, Authentication & RBAC

Experience

Junior Engineer- Intern

Aug 2025 – Nov 2025

Novas Arc Consulting Pvt. Ltd.

Hyderabad, Telangana

- Migrated a large production frontend from Create React App to Vite, achieving 5× faster build times and significantly improving developer productivity.
- Developed and maintained end-to-end MERN features, owning UI, API integration, and backend logic.
- Built highly interactive React components using Redux Toolkit, dnd-kit, and ShadCN/UI, improving UI responsiveness by 30–40%.
- Designed and optimized RESTful APIs and MongoDB schemas, doubling backend performance through query restructuring and indexing.
- Implemented JWT-based authentication, role-based access control, and robust error-handling middleware, reducing API failures by 20%.
- Collaborated cross-functionally in an Agile setup, participating in code reviews and feature planning discussions

Intern

Apr 2025 – Oct 2025

Daemonhive Technologies

Remote

- Designed UI/UX for an internal company application using Figma, creating structured wireframes and component-based layouts.
- Converted Figma designs into responsive front-end interfaces using React.js, HTML, CSS, and JavaScript.
- Built backend APIs using Node.js and Express.js to handle application logic and data processing.
- Integrated MongoDB for database management and implemented CRUD operations.
- Connected frontend with backend APIs to enable dynamic data rendering and user interaction.
- Collaborated with the development team to improve UI usability and maintain clean, modular MERN stack architecture.

Projects

Thinkloft (AI Chat Interface) | | React, Context API, Tailwind CSS

- Built a Gemini-style AI chat interface with scalable React architecture and clean state management.
- Implemented custom hooks for managing real-time conversational flows.
- Improved accessibility and UX flow, increasing task completion efficiency by 30%. Deployed with HTTPS and custom domain using modern frontend tooling.
- Deployed with HTTPS and custom domain using modern frontend tooling.

Breeze Travel | | React, Node.js, Express, MongoDB, JWT, Redux

- Architected a secure authentication and authorization system using JWT, middleware, and encryption techniques.
- Reduced API response latency by up to 90% using route-level caching and optimized MongoDB aggregation pipelines.
- Designed scalable REST APIs handling complex relational data with high reliability and performance.
- Focused on production-grade security practices to protect sensitive user data.

Estate (Real Estate Listings Platform) | | React.js, Tailwind CSS, Web3Forms API, Framer Motion

- Developed a fully responsive, mobile-friendly property browsing experience.
- Integrated Web3Forms for reliable lead capture, achieving 100% form delivery success.
- Added motion and interaction enhancements, increasing session duration by 40%.

Education

Dr. A.P.J Abdul Kalam Technical University

Sep 2021 - May 2025

Bachelor of Technology in Computer Science

Scored: 71%
