Professional Summary

Full Stack Software Engineer skilled in .NET, Angular, and MERN stack development. Experienced in building REST APIs, microservices, secure authentication, JWT, RSA-based encryption, database-driven applications, and responsive web interfaces. Proficient in developing and integrating scalable frontend and backend solutions across the full application lifecycle.

Technical Skills

Programming Languages: C#, JavaScript (ES6+), TypeScript

Frontend Technologies: React.js, Angular

Backend Technologies: ASP.NET Core, ASP.NET Web API, Entity Framework, Node.js, Express.js

Databases: SQL Server, MongoDB

Tools & Platforms: Git, GitHub, Postman

Experience

Software Engineer

May 2025 – Present

LTM

Chennai, Tamil Nadu

- Led a 6-member team, driving task allocation, technical implementation, API integration, and project delivery.
- Developed REST APIs using ASP.NET Web API with JWT-based authentication and role-based authorization.
- Implemented RSA-based encryption for sensitive payloads, securing data exchanged between frontend and backend.
- Contributed to a microservices architecture by developing and integrating backend services and REST APIs.
- Built Angular frontend modules and integrated REST APIs for end-to-end application workflows.
- Used SQL Server and Entity Framework for data access, queries, and backend business logic.

Junior Engineer - Intern

Aug 2025 – Apr 2026

Novas Arc Consulting Private Limited

Hyderabad, Telangana

- Migrated a production React frontend from Create React App to Vite, reducing build time and improving the development workflow.
- Built interactive React components using Redux Toolkit, dnd-kit, and ShadCN/UI.
- Designed and optimized RESTful APIs and MongoDB schemas using query optimization and indexing.
- Implemented JWT-based authentication, role-based access control, and centralized error handling to improve API security and reliability.
- Collaborated in an Agile team through code reviews, feature planning, debugging, and testing.

Projects

Vexa - Project Management Tool

- Led frontend development within a 3-member team, coordinating feature implementation, API integration, debugging, and delivery.
- Developed a full-stack project management platform using React.js, Node.js, Express.js, and MongoDB for managing projects, tasks, teams, and workflows.
- Built an interactive Kanban board using dnd-kit with drag-and-drop task management, reordering, and dynamic status workflows.
- Implemented JWT-based authentication, role-based access control, and protected REST APIs using reusable middleware.
- Designed REST APIs and MongoDB schemas for projects, tasks, users, comments, attachments, and activity history.

Education

Dr. A.P.J Abdul Kalam Technical University

Sep 2021 - May 2025

Bachelor of Technology in Computer Science
